

Damira Keček was born on September 29, 1981 in Čakovec, Republic of Croatia. She finished her high school education in Grammar School in Čakovec. In 2007 she graduated from the Faculty of Science in Zagreb, in the Department of Mathematics, programme Financial and Business Mathematics. After she graduated, she worked in Međimurje IPC d.d. and the tasks included programming and maintenance of information systems. Currently she works as a senior lecturer at the University North in Varaždin, Republic of Croatia. She gives lectures and auditory exercises at undergraduate professional studies in Mathematics I and Mathematics II. She regularly participates in national and international scientific and professional conferences, publishing scientific and professional papers in the field of economics, mathematics and information sciences. Recently, she participated as an expert on the project "An Integral Analysis of the Effects of the Development and Construction of Renewable Energy Sources in Croatia in the Period 2007-2016", where the Institute of Economics in Zagreb was the project holder. On May 15, 2017 she received the Rotary Club Varaždin Award for Excellence in 2016 in the category of Published scientific paper for the paper titled "Analysis of multiplier effects of ICT sectors - a Croatian case", published in the journal Croatian Operational Research Review.
