

SuTra 2024

International Conference on Sustainable Transport

26 to 28 September 2024

Terme Sveti Martin Resort, Croatia

THE SECOND ANNOUNCEMENT

The second announcement: News and build-up

Dear colleagues,

We are pleased to inform you about our confirmed panel sessions:

- Generative AI in Intelligent Transportation Systems
- Leaders of the urban mobility transition
- How to improve rural mobility in the service of rural tourism
- Opportunities for cooperation between academic institutions through the Civitas Educational Network

The panel sessions will take place during the conference days, as well as the research projects' dissemination. For the latter, you will find additional information below.

Instructions for Contributors

The abstract templates are now prepared for your convenience. During the abstract submission and/or registration, you can choose among the following options:

- [abstract/project summary](#) submission only*;
- full paper submission to be sent for the consideration for publication in one of the accompanying journals**; or
- full paper submission for the consideration for publication in the conference proceedings**.

All submissions are subject to review. Nevertheless the chosen option, authors are expected to prepare and present their research results in form of presentations or posters, depending on the editorial board decision.

*NEW: Authors which plan to disseminate their research projects should use the appropriate project summary template. Depending on the number of project summaries, a dedicated section/s will be provided.

**In this phase, the abstract submission is mandatory for all three options. Please indicate in the ["Your Message"](#) section the desired option.

Welcome to the SuTra2024 Conference!

Conference Topics and planned Sessions (including, but not limited to)

ATR. Air Transport	• Airport City as a concept of development • Alternative fuels • Business process • Low-cost business model • Noise monitoring system
IMT. Intermodal and Multimodal Transport	• Data analytics • Optimization modelling and simulation analysis • Transport networks • Travel behaviour analysis and demand modelling • Vehicle routing, scheduling, and dispatching
ITST. ITS and Telecommunications	• Connected vehicles • Digitalization • Information and communication technologies • Intelligent transport infrastructure • Intelligent vehicle technologies • Smart mobility and sustainable transport services • Generative AI in Intelligent Transportation Systems
LSC. Logistics and Supply Chain	• Automation and Robotics • Blockchain applications • Urban Logistics • Green logistics • Quality and Risk management • Fleet Management

MIT. Maritime and Inland Transportation	• Sustainable maritime and inland transportation • Marine engineering and alternative fuels • Advanced vehicles • Navigation information systems • Integrated route planning • Digital navigation and e-concepts • Marine ecology and protection of sea and water resources
RATR. Rail Transport	• Capacity • High-speed railway • Public service obligation contracts • Rolling stock • Technology • Timetabling • Train access charges
ROTR. Road Transport	• Theory and modelling • Data management • Safety analysis and policy • Transport planning • Infrastructure management • Traffic control, signing and markings
SASC. Smart and Sustainable Cities	• Big Data • New pricing measures • Sustainable communities • Urban public transport • Urban transport modelling
SMOB. Sustainable Mobility	• Intelligent mobility • Low and zero emission areas • Micromobility • Mobility as a Service (MaaS) • Sharing and pooling • Sustainable Urban Mobility Plan (SUMP)
TT. Traffic and Tourism	• Urban tourism • Rural tourism • Nautical Tourism

Preliminary event schedule*

26 September – Opening ceremony, Plenary lectures and keynote speakers, Panel sessions, Projects' dissemination session, excursion**
